ABOUT US

- Established in 2000, TERLEMEZ COLD STORAGE started its journey in Karaman, Turkey. Soon after, KUBAN Trading was established as the trading arm of TERLEMEZ COLD STORAGE, Our cold storage capacity is 3000 tons in 3500 sqm KUBAN FOODS is the fastest growing exporter of fresh fruits in the region.
- **Our Mission**
- At KUBAN FOODS we are committed to providing high quality fruit from sustainable sources. Our trained crew ensures that orders are fulfilled on time, using only organic and healthy fruits such as pomegranates and apples. This commitment to quality and sustainability has cemented our reputation in the industry.
- **Specialization**
- Our company specialises in the production and export of pomegranates and apples. While apples are our main export, pomegranates also play an important role in our range. All of our fruit and vegetables are sourced locally in Karaman, Turkey, ensuring the freshest produce for our customers. Facilities and logistics.
- **Facilities and Logistics**
- KUBAN FOODS owns a state of the art warehouse in the Karaman Organised Industrial Zone (OSB) and primarily uses Mersin Port for our exports. As KUBAN TRADE, our cold storage TERLEMEZ SOGUK HAVA DEPOSU capacity is 3.000 tones . In Karaman, approximately 435,000 tons of apples are produced annually on an area of approximately 209,000 decares. To support this production, there are 44 cold stores with a total capacity of around 200,000 tonnes.

SACARLET SPUR

- **Characteristics of the fruit:** Its fruits are large and conical. Its peel is dark red, its pulp is sweet, juicy, hard and delicious. Its color turns red at the end of August. This kind is preferred due to its easy coloring, especially in regions, where there is coloring problem.
- **Harvest Season:** It is harvested during the 1st and 2nd week of September in Central Anatolia Region

GALA

- **Fruit characteristics**
- Its tree is strong and it develops in semi virgate form. Its color formation starts earlier in comparison to other Gala types and coloration is more intense. Fruit peel upper color is 90-100% red. The fruit has an aroma and an excellent taste. Its other fruit characteristics are the same especially with Gala kind.
It can be stored in normal cold storage for 3-4 months and 6-7 months in atmosphere controlled cold storage. It is a good duster for all kinds.
Harvest Season:
It should be harvested gradually in 2 – 3 runs during the 1st and 2nd weeks of August

PINK LADY

- **Fruit Characteristics:**
Its fruits are medium in size and long-cylindrical. Its peel is pink on light yellow background. Fruit reaches an excellent aroma when consumed a few months after harvest time. It is very suitable for transport and cold storage and can be kept for 7-8 months without losing its characteristics.
-
- **Harvest Season:**
It is harvested the first and second week of November.
-

FUJI

- **Fruit Characteristics:**
Its fruits are red on yellow-orange background. It has medium and large fruits. Its fruit flesh is pale orange and it is hard, crunchy, very juicy, sweet and delicious. It keeps its hard and crunchy structure for a long time. It can be kept longer than other types.
- **Harvest Season:**
It is harvested the last week of October.

GOLDEN REINDERS

- **Golden Reinders**
- **Fruit characteristics:**

The tree does not exhibit periodicity if appropriate thinning is performed and its fruits are large. Fruits are yellowish green, juicy, crunchy, hard and edibility is good. It can be kept in cold storage for 160-170 days and atmosphere controlled storage for (CA) 310-320 days.

Harvest Season:
It is harvested the second week of September.

GOLDEN SMOTHE

- **Fruit characteristics:**

The tree does not exhibit periodicity if appropriate thinning is performed and its fruits are large. Fruits are yellowish green, juicy, crunchy, hard and edibility is good. It can be kept in cold storage for 160-170 days and atmosphere controlled storage for (CA) 310-320 days.

Harvest Season:

It is harvested the second week of September.

GRANNY SMITH

- **Fruit characteristics:**

Its fruits are large and have a global shape, they have green and oily peel. It is juicy, crunchy, edibility is good, slightly acidous, slightly sour and has an exclusive aroma.

-

- **Harvest Season:**

It is harvested at the end of of September and beginning of October.

KUBAN FOODS

POMEGRANATE

- **We grow Pomegrante in our 200.000 m2 garden ;**
- **Annual capacities 600 tones.**
- **HICAZ** This is a patented cultivar developed by the Antalya Western Mediterranean Research Institute (BATEM) which is very popular in the domestic and international markets. Most of Turkey's pomegranate exports are of the Hicaz variety. This is a late maturing variety which is usually harvested between 5 – 25 October. It is very suitable for storage where it can be kept for up to six months. Depending on regional conditions, soil and maintenance, economic level production starts in the third year at the earliest. The fruit is large and heavy. The skin is red and the fruit is crimson. Water yield is 48.01%, fruit
